

# ULIX-5

## POWER AND LIGHTNESS FOR COLLECTION

The **ARVIPO Ulix-5** olive comb works with a 12V battery, a lithium backpack battery, or with a generator, with the adequate power to offer the optimal energy for olive trees without damaging the tree or the fruit.

With the variable **5-speed** oscillating motion electronic system of the head starting from **600 vibrations / minute up to 1250**, you can choose the appropriate speed for each type of harvest, controlling electricity consumption.

Equipped with 8 carbon fiber rods with an enviable performance, it allows a high torque at low revolutions for the collection of table olives.

### ELECTRIC COMB WITH 8 CARBON FIBER RODS

# ULIX-5

## POWER

With a 12V and 750 Watt electric motor, the electric comb guarantees a **collecting capacity of 135-230 kg/hour**.

## LIGHT AND HANDY

With a weight of 2.4 kg, the **ARVIPO ULIX 5** Comb is a super light shaker that will allow you to work intense days with little effort.

## ADAPTABLE LENGTH

With an adaptable length from 2m to 2.5m, you can adjust the measurement to the highest jobs to precisely reach the most remote areas.

\* The harness may undergo modifications.

An electronic control panel for the regulation of up to 5 speeds that allows selecting the optimum speed for each type of harvest.

	Comb Weight	2,4 kg
	Harness Weight	2,8 kg
	Longitud	2m - 2,5m
	Length	Brushless
	Power	750 Watt
	Motor voltage	12-18V DC
	Collecting capacity	135-230 Kg/hour
	Control Panel	5 speeds
	Adjustable speed	de 600 a 1250 cycles / min
	Electrical power supply	12V DC battery
	Power cable	15m
	Lithium battery	
	Nominal voltage	12V
	Maximum voltage	14.8V
	Autonomy	8 hours
